Apicultura i terrenys forestals

Coppice:

Many hardwood species in Spain (*Quercus*, *Castanea*, *Fagus*, *Platanus*, *Alnus*, *Populus*, *Salix*, *Betula*, *Fraxinus*, *Eucaliptus*)

3 main species at present:

Quercus ilex

Quercus faginea/pubescens

Quercus pyrenaica

Responsible for >80% area, fuelwood

In the past, several coppice modalities and rotations.

Wide range of products, depending on the species: fuelwood and charcoal, saw timber, sticks, poles, bark for distillation (tannins), fodder, pulpwood, etc.
