

# Progress report WG 5

The main objective of the Action is to understand, to raise awareness for, stimulate research & development and promote Coppice Forest Management (CFM) to meet specific actual and further needs of (rural) societies on a European level.

# WORK PLAN

1. Compiling different governance concepts related to CFM with special regard to ownership and utilization rights.
2. Analysing how these traditional concepts fit into existing “modern” forest legislation and elaborate possible contradictions and conflicts.
3. Developing ideas and deriving concepts to introduce traditional coppice forest governance into small scale forestry issues.
4. Organize a conference on coppice forests ownership and governance – what can we learn for small scale forestry?

# 1 Your input from today

- Flip charts – issues for coppice in your country
- Sheets in the conference packs

# 2 Governance Issues Matrix

Political (strategic level)	national government state forest service regional government local government subsidies freedom of movement (EU) le collectivisation/private/public
Social (operational)	Health and safety Insurance

Economic

markets

(subsidies)

Management costs

Supply chain costs

Labour/ pensions/  
sick pay/

Environmental

EPS

National protection

SAC/national reserves

# 3 Oral History & Gender issues
